PROFILE

Computer Science graduate with hands on experience in Laravel web development and Android/Flutter mobile application development. Skilled in designing and developing scalable web and mobile applications, building RESTful APIs and working with MySQL, MongoDB and Firebase. A quick learner with a strong ability to adapt to new technologies and solve complex technical challenges. Committed to delivering clean, maintainable and high-performance software while collaborating effectively in team environments.

TECHNICAL SKILLS

- **Languages:** Java, Kotlin, Dart, PHP, Python, JavaScript
- **Frameworks & Libraries:** Flutter, Laravel, React, Flask, Tailwind CSS
- **Databases:** MySQL, Firebase, MongoDB
- **Tools & Platforms:** Android Studio, Git

PROFESSIONAL EXPERIENCE

Web Developer Intern

March 2026 to Present

Keen Rabbits Pvt Ltd.

- Develop and maintain web applications using **Laravel** and **PHP**.
- Design and implement **RESTful APIs** and backend functionalities.
- Work with **MySQL**, **Git** and Laravel MVC architecture.
- Collaborate with the development team to add new features, fix bugs and improve application performance.

Freelance Mobile Application Developer

June 2024 to December 2025

Self Employed

- Develop Android and Flutter mobile applications for clients.
- Gather client requirements and deliver mobile applications within deadlines.

PROJECTS / RESEARCH EXPERIENCE

Tea Leaf Disease Detection System with Explainable AI – Sri Lankan Study (Final Research Project)

Python, TensorFlow/Keras, MobileNetV3-Large, FastAPI, Flutter

- Collected and curated a Sri Lankan tea leaf image dataset covering Black Blight, Grey Blight, Spider Mites and Healthy leaves.
- Developed and evaluated deep learning models selecting MobileNetV3-Large as the best-performing model for disease classification.
- Implemented Grad-CAM Explainable AI and built a Flutter mobile application with a FastAPI backend for image-based disease detection and visual explanations.

Interest Collector

Java, Firebase, Android Studio

- Built an Android app to add, organize, and manage user interests.
- Implemented Bluetooth printing to share collected interests efficiently.

Employee Management System (EMS)

Laravel, MySQL, React

- Developed a full-stack system featuring role based access control and leave management functionalities.
- Designed and implemented RESTful APIs to facilitate seamless communication between the frontend and back end.

UniTickets Web Platform (Group Project)

PHP, MySQL

- Built a university event ticket booking system with user registration, verification, and ticket limits.
- Implemented admin dashboard, event management, and role based access control.

Personal Portfolio

React, JavaScript

- Developed and deployed a responsive (Single Page) application using React and JS to showcase development projects and technical skills.
- Ensured optimal UI/UX design and cross-browser compatibility for a seamless viewing experience on all devices.

EDUCATION

University of Jaffna – Vavuniya Campus

Oct 2022 to July 2026

BSc (Hons) in Computer Science

VOLUNTEERING

- Member of ITCS - University of Jaffna
- IEEE volunteer - University of Jaffna

INTERESTS

- Mobile App Development
- Web Development
- Computer Network
- AI
